

How plants reproduce

<https://www.bbc.co.uk/bitesize/articles/zngnrd> .

Watch and complete activities 1 and 2 online.

Then complete activity 3 below.

Growing seeds into healthy plants

Which seed do you predict will grow into a healthy

Seed A:

- Seed planted in soil.
- Regularly watered.
- Positioned in sunlight.
- Protected from high & low temperatures.

Seed B:

- Seed planted in soil.
- Watered when it rains.
- Positioned outside near a shady fence.
- Not protected from high & low temperatures.

Seed C:

- Seed planted in soil.
- Watered once a week.
- Positioned in a cupboard.
- Kept next to hot water pipes.

Seed D:

- Seed planted in soil.
- Watered six times a day.
- Positioned by a window.
- Kept in the bathroom.
