

Climates of North America

Choose a North American location.

Identify where the location is on a map of North America.

Use different sources of information to find out what the climate is like in your chosen location.

Present the information you have found out in an engaging way.

What the average temperature is for each month of the year?

How much precipitation (rain, sleet or snow) is there on average?

How is the climate classified? Is it tropical, temperate, desert, subarctic?

Is it a windy place? Is it prone to hurricanes or tropical storms?

Is it a humid or a dry place?

How much sunshine on average does this location get?

Why not use a template on purple Mash to present your work.
