# Animals

invertebrates

spider

exoskeleton

vertebrates

fish

mammal

horse

## Questions:

Which animals are most like humans?

Which animals are native to my country?

## Key words

| vertebrate | invertebrate | mammal |
| --- | --- | --- |
| fish | bird | reptile |
| amphibian | habitat | endangered |
| exoskeleton | skeleton | carnivore |
| herbivore | omnivore | predator |

## Facts:

Scientists have grouped animals to make it easier to study them – kingdom, phylum, class, order, family, genus and species.

For example, a swan would belong to the Animal Kingdom, with phylum of animals with a backbone, class of bird, order of water fowl, family of anatidae, genus of Cygnus and species of buccinator!
